

First of all, I really enjoyed the task 😊 I got to know the meaning of project “Social Care”.

But according to task I had to suggest a new name. The name I want to suggest is “Liquid galaxy Community Welfare”.

There are many reasons behind this name ...

The word “Community” I used this because the community here refers to all those people in our reach, without thinking of their caste, creed, sex, religion, etc. We have to change the perspective, because Humanity is what matters the most.

I want the world free from any discrimination.

Community is an area of social living marked by some degree of social coherence. This is the reason I used the community word here...

Now moving to the “Welfare” word, as said in the task description we have to help those

people in need, to help them with food, clothing, and lodging, job etc.

Welfare here is used to help people without any earning motive. It should be social in motive and provide psychological satisfaction.

Thus, these two words combines, which helps the community or society for a better living and future. I think that “Liquid Galaxy Community Welfare” is a good alternative.

Functionality ideas:-

- 1) It can show the help rate.
- 2) Can show the number of people involved.
- 3) Can have a leaderboard.
- 4) Can show monthly goal or things done.
